**Are there additional products (e.g., brochures, maps) that you feel would have helped you with the training tasks?**

- 7 – “No” responses
- 3 – “n/a” responses
- Copies of the PowerPoint info to take back and share with our planning commission
- List attendees
- better access to existing reg.
- not necessary
- would loved to have copies available of pertinent parts of power pt. presentations
- a list of software that John Lambie was talking about
- either reference to a website where data/info can be accessed or handouts from each speaker re: stats, charts, etc.
- written email addresses that were talked about
- writing utensil, tablet
- a recommended list of books & sites as well as computer programs & where to get them to help implement Smart Growth
- handouts from speakers
- have the speakers provide a handout copy of their presentation or, at least, an outline or summary
- a list of planning software tools to aid the non P.E. planner
- list of attendees
- info on current local laws
- information on grants available and/or technical services
- organized booklet that leads you through presentations, w/a attachments
- web site addresses referred to in presentation
- great to have a list of those attending
- possible syllabus from speakers
- yes, maps or models of specific areas like Dauphin St.
- technical information about applying this to management
- yes
- more brochures
- can't evaluate until reading material later
- unsure
- CD of graphic presentations

**18 April 2006**  
**Smart Coast – Host**

**Are there future training topics or speakers you would like to recommend?**

- 5 – “No” responses
- Jennifer Fiddler – Fairhope Public works original City Horticulturist for Eufaula, AL
- Eric O. Jacobsen re: what churches can do
- Combine transit element with regional planning
- GIS in planning
- How to get community involvement
- If I think of any I’ll contact Wendy, Charlene, or Cheryl
- The developers of SeaSide, FL
- Yes, but don’t have info available
- More on regionalism and getting the 2 counties together
- Transportation/slow traffic/what’s been done in US
- Dr. Crozier
- Sierra Club Building Better and Cool Cities Campaigns (speakers from DC for this program)
- Political diplomacy – how to affect change in community/creating the vision
- More information on how to do mixed use
- Can’t say at this time
- Other southern city mayors
- Green subdivision, conservation subdivisions, riparian buffers
- How to get started w/ step by step details possible form committees or groups to discuss set goals for accomplishments by specified date – meet & discuss
- Topic: stopping urban sprawl, biking/walking trails
- Planning comm. Members of the city of Mobile & staff
- How to fund these projects
- “Smart Growth Principles”, “TNDs”, “Cluster Vs. Traditional Developments,” “Should we develop in flood prone areas and what are the alternatives?” “Parks & other public area”
- Eric Damion Kelly, Dwight Merriam, Charles Harr, J. Lee Rodgers, Robert J. Juster, George Crozier, Doug Phillips\* (see contact info)
- Mayor of Chattanooga has achieved a metamorphosis of a waterfront city.
- Someone who can start with the basics and work upward
- Where do we go from here?
- Workshop related to historical home restoration and business tax credits related to historic districts
- I Would like to hear more about different financing tools

**Imagine: A Region with Thriving Mixed Use Cities**  
**18 April 2006**  
**Smart Coast – Host**

- Public paths – jogging trails – ideals of our waterfront
- What can an individual do? How can we influence our companies to help?
- Mayor Sam Jones to give his perspective of downtown goals – both long & short term
- We need vision & strategic planning with all stakeholders present for the Mobile/Baldwin region
- Current situation – history of how we got to where we are now: hollowed out cities and suburban rings with poor land-use and lacking infrastructure. Smart Growth might turn this around.
- Someone from Memphis. Memphis has had problems
- I would like to see more cultures (African Americans) interest, and receive information and understanding of mixed use and smart tools
- Zoning changes to encourage mixed use
- \*Mobile need a plan for 300 years into the future for a world class city\*
- How to: make #s work/AIG Bake representative
- “Green building” “Tourism”
- Wanda Cockran, atty & city atty – very knowledgeable about local issues/development planning
- Minority speaker
- Behavior of stakeholders/ populations & how behavior affects lifestyle & where we choose to live
- Yes. Sponsors in the business of financing small business (regional, private or business)
- Tell us how to go about achieving goals, working with government agencies, etc.

**Please provide any additional comment you would like to make:**

- I thoroughly enjoyed seminar & benefited from new stimulation
- Great! Want Tom Murphy to run for Fairhope Mayor
- Very interesting
- Gracias!
- Joe Riley & Tom Murphy were excellent
- The overall program was wonderful. Speakers were awesome. A job well done!
- Very helpful information!
- Great job, Wendy & Charlene!
- No
- Excellent job
- More aware of global interest/remarkably surprised and held by speaker
- Please provide refreshments during breaks
- Great program

**Imagine: A Region with Thriving Mixed Use Cities**  
**18 April 2006**  
**Smart Coast – Host**

- Look forward to more
- Wonderful presenters!
- Thank you
- Great!
- Excellent program! Too bad the mayor didn't stay
- Need to have access to water, coffee, tea, soft drinks throughout conference
- Would be happy to be involved to participate in future seminars. Thanks you for bringing it to Mobile with such great speakers – that were able to share. Hopefully our mayor city council et al, will use their expertise to pressure in moving Mobile forward w/ Smart Growth.
- This conference was great! Very energizing and motivating...I want to move downtown and work from my home. The Sierra Club embraces mixed use communities and look forward to working with Smart Coast in the future
- Great conference!
- Wonderful meeting
- Thanks for the hard work
- Good speakers. Mayor Riley especially good and entertaining!
- Overall, necessity rather vague – some speakers were off-topic as points; historic preservation – downtown renaissance – story are preserve
- I would like more public access waterfront on both sides of the bay. Also it would be great if Baldwin Cty could become more 'bikeable' (I appreciate what's been done so far.) ☺
- Very informative inspiring and promotes challenges. Offend [*sic*: often] 1<sup>st</sup> hand experience knowledge, life and synergies. Looking forward to the next one
- Great information, well presented. Involvement of SARPC? Involvement of Mobile & Baldwin County, Commissions & Planning departments?
- Would like information regarding funding for infrastructure costs, i.e., developers required fees
- Invite developers and officials to more of these conferences to educate them about smart development so groups like ours are better received when we contact these people with our plans
- Thanks. Visioning intellect and culturally sensitive presenters were a welcome alternative
- Speakers were Great! Suggestions: more bottle water/drinks. Thank you for enabling us to get CE credits. Wonderful job...thank you!!
- Needless global warming hype, more specific details about green building and ways to get gov'ts to adopt it.
- Given my personality, I would like to be involved and educated in a smaller environment. I also would like web addresses of speakers for future contact. Would like to be of help from the construction background that I offer. Thank you.
- A & V will sponsor running during presentation should have only been shown during breaks only, distracting during presentation
- Great speakers and information
- What's next? How do we implement what we have learned

**Imagine: A Region with Thriving Mixed Use Cities**  
**18 April 2006**  
**Smart Coast – Host**

- Would have liked to see break-out groups for discussion & networking; more importantly – you put on a fantastic conference! Excellent speakers. Well Done!
- Require elected officials to attend & staffs
- My only problem was that the constantly changing images on screen distracted me – my concentration on the speaker’s message flicked - not major but easy to handle
- The ideas are excellent but we must now reach out to the leaders and masses to get them, out of the CAVE (Citizens against virtually every thing) and NIMBY (not in my back yard) mentality, that is so prevalent in this city
- Think the Mobile City Council should have been in attendance
- Important individual that I did not see in attendance:
  - Mobile city council members
  - Mobile county commission
  - Mobile mayor – except for lunch
  - Mobile county school board member
- I would like to see seminars like this continue. To educate, and continue to educate our community. I would like to see some kind of ‘legal’ action implements to make owners of dilapidated building on Dauphin Street, or Least, fix the facades of these buildings or be required to sell them at the value they are worth.
- Needed more content about Smart Growth, examples
- Mayor Riley’s speed was the highlight – very inspiring. Appreciated Chad Emerson’s honesty. Question & answer portion of panel presentation was not very helpful. Would have preferred more concrete answer to questions. Saw many examples of the right and wrong ways of doing things. How about doing a follow up that provides suggestions of how to achieve goals. Interested in stopping new bridge at the proposed location. Preserving Barton Academy & raising the standard in Mobile & entire area. Transportation issues.
- No
- Step 2 for Smart Coast is? Recommendation – discuss ethnic & multi-culture issues related to Smart Growth. Strategies for cooperation. How to influence change. Change is the only constant – program on how to handle change and how to get your voice heard with public officials. Great conference. Now what is done with the day & where do we go from here? Recommend: water & coffee at AM break. Videotaping/audio taping of speakers to see or use later on. Need to have minority speakers and females. Talk about ethnic diversity in mixed com/cities. Copy of notes from speakers to download on web.
- Need a more diverse panelist (speakers)
- This was extremely well done I will look forward to more events!
- Actually I need something more specific to the area. I enjoyed learning of how things are done in other areas but are not totally pertinent to this area. Emerson of the more direct to info needed. The mayors’ really were, as mayors do, complimenting their accomplishments – nice guys as they are, their comments were not real germane to what we need.
- Refreshments for guest – failing grade. Not even any water easily available during hours of meeting.

**Imagine: A Region with Thriving Mixed Use Cities**  
**18 April 2006**  
**Smart Coast – Host**

- I'd like to see us get deeply into the overhaul of our zoning ordinances.
- As a non-profit organization that has been helping to rebuild communities the information and conference was helpful.
- Attendance, this time has been so very interesting, worth more a day's work
- I wish we had more of a local authority present to apply knowledge presented to specific regional concerns
- Great conference! Future topics/issues: how do we make public transportation work with our current situation? (in Mobile & Baldwin Counties). If we continue to allow developers keep on their course, how can we encourage them to become energywise, firewise, healthwise and provide for access to public transportation? How can we get our Landuse Planning and Development ordinances zoning laws to be more adaptive to Smart Growth? More "home rule" for local governments to allow mixed use.
